

- **BookList**

- Mission statement
 - Textbooks are too expensive
- Presentation
 - Firebase integration with Gmail
 - Sign in with Gmail or sandiego.edu email
 - Users can search by subject (e.g., Computer Science)
 - Or by class (e.g., COMP 280)
 - Sellers can only post up to 10 books at a time
 - To avoid clogging, abuse of the app
 - Each entry contains the price and seller contact info
 - Suggestion: phone number should be optional for sellers to add
 - Searching
 - Search by book title, at least, is essential for the app
 - Should also be able to search by author, ISBN
 - Sorting
 - Sort by price
- Evaluation
 - Suggestions
 - Sellers should be able to post more than 10 books at a time
 - Increased to 20
 - We should implement recommendations to lower the price of a listing
 - Requests section
 - We can implement that, and split the app between selling and buying listings
 - Liability waiver, terms and conditions
 - Questions
 - How do people meet up?
 - Users have to contact each other via email or phone number
 - What if people repeatedly post books for prices that are far too high?
 - No one will buy it
